

# Talking with Parents/Guardians about Score Reports

Students who take Dynamic Learning Maps® (DLM®) alternate assessments receive score reports following their spring assessments. These reports become available in Educator Portal over the summer, and teachers typically access them in the fall when they come back to school. This guide is designed to help teachers talk about the DLM score reports when meeting with parents and guardians in the fall.

For questions about school and state accountability, please contact your district test coordinator or state department of education.

A Parent Interpretive Guide for DLM score reports is located on your state’s DLM webpage. Review this guide and share it with parents. To find the guide,

- Visit the [DLM website](#).
- In the banner at the top of the screen, go to the **FOR STATES** tab and select your state.
- Select the **Scoring and Reporting** filter under **Resource Category** to filter resources.
- Scroll down the page and click on “Parent Interpretive Guide.” This guide can be downloaded and printed.

## Getting Ready for the Meeting

- Set a positive tone when meeting with parents/guardians to review the Parent Interpretive Guide and the student’s results.
- Review the report, the Parent Interpretive Guide, and this guide to make sure you are comfortable with the language in the report.
- Think about different explanations you may need to provide to describe the report contents. If you need to modify the language in the report, be careful not to change the intended meaning. For example, it would be acceptable to substitute “reading and writing” for “English language arts” or “ELA.” However, do not refer to ELA as just “reading,” because the ELA assessment includes more than just reading.
- Review sections of the TEST ADMINISTRATION MANUAL and ACCESSIBILITY MANUAL to remind yourself about topics that parents are likely to ask about.

## Discussing the Score Report

The report has two parts for each subject: a Performance Profile and a Learning Profile.

- The Performance Profile contains summary results for the claim, conceptual area, or domain and for the subject as a whole.
- The Learning Profile summarizes the student’s mastery of specific linkage levels for each Essential Element.

Key points about each section of the Performance Profile are summarized below.

## Overall Results

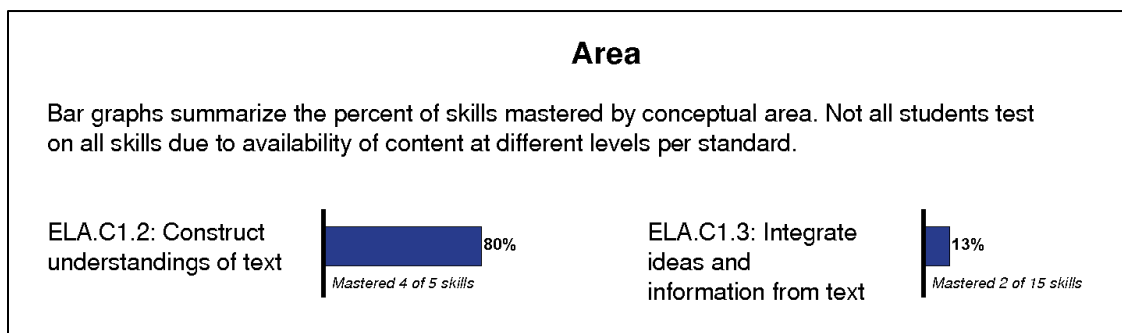

- This section explains the student’s overall performance in Essential Elements for the grade and subject.
- Remind parents/guardians that skills demonstrated during this assessment provide only one piece of evidence about what their child knows and can do.
- Caution parents against thinking that the number of linkage levels mastered is a raw score or number of items correct.
- Provide examples of the Essential Elements. If appropriate, tell and/or show the parents/guardians where the Essential Elements are located on your state webpage.
- Give academic examples of the skills. Help with this can be found in the mini-maps for each Essential Element.
- Tell or show parents/guardians how the Essential Elements relate to what is being taught to grade-level peers.

## Performance Categories

- Explain that “At Target” means the student has met the grade-level standard.
- Focus on the student’s highest level of mastery.
- [In states that convert DLM performance level descriptors into the state’s labels] Explain how the DLM performance levels correspond to the state performance level descriptors.
- If parents/guardians are concerned about low performance, remind them that the DLM assessment has high expectations, perhaps higher than the past alternate assessment. Students have room to grow and do even more in the future.

## Areas<sup>1</sup>

- This section summarizes the student’s performance in groups of related Essential Elements within the subject.
- Focus on what the student has mastered<sup>2</sup>.
- Sometimes students demonstrate skills during instruction but not during the assessment.

Remember, convey to parents/guardians how the DLM assessment is a part of their child’s educational journey.

<sup>1</sup>“Claims” are used in mathematics and “Domains” are used in science when referring to this portion of the report.

<sup>2</sup> Student mastery of skills is an estimate of mastery made with reasonable certainty. As with any test result, the skills a student demonstrates may vary across administrations.

## Learning Profile

- This section shows the student’s mastery of certain skills, or levels, for each Essential Element. Each row is one Essential Element. Each level is a skill.
- Explain that the Target is the grade-level expectation for all students.
- Explain the green boxes. Focus on what skills the student was able to show during the assessment. Sometimes students perform skills inconsistently. Other times they show skills during instruction but may not have shown them during the DLM alternate assessment.
- Provide examples of how the student demonstrates knowledge of this skill during instruction.
- Encourage the parent to think about the blue, gray, or white boxes as areas for future instructional goals.
- Explain the blueprint and how choices were made about which Essential Elements and levels to assess.

**REPORT DATE:** 01-21-2024  
**SUBJECT:** English language arts  
**GRADE:** 10

**NAME:** Student DLM  
**DISTRICT:** DLM District  
**SCHOOL:** DLM School

**Individual Student End-of-Year Report**  
**Learning Profile 2023-2024**

**DISTRICT ID:** DLM District  
**STATE:** DLM State  
**STATE ID:** DLM State ID

Student’s performance in 10<sup>th</sup> grade English language arts Essential Elements is summarized below. This information is based on all of the DLM tests Student took during the 2023–2024 school year. Grade 10 had 19 Essential Elements in 4 Areas available for instruction during the 2023–2024 school year. The minimum required number of Essential Elements for testing in 10<sup>th</sup> grade was 10. Student was tested on 13 Essential Elements in 4 of the 4 Areas.

Demonstrating mastery of a Level during the assessment assumes mastery of all prior Levels in the Essential Element. This table describes what skills your child demonstrated in the assessment and how those skills compare to grade level expectations.

Area	Essential Element	Level Mastery				
		1 (Initial Precursor)	2 (Distal Precursor)	3 (Proximal Precursor)	4 (Target)	5 (Successor)
ELA.C1.2	ELA.EE.RL.9-10.1	Identify concrete details in a familiar story	Answer questions by referring to a text	Cite textual evidence for explicit information in text	Discriminate between explicit and implicit citations	Determine a narrative’s explicit meaning
ELA.C1.2	ELA.EE.RL.9-10.2	Identify the forward sequence in a familiar routine	Identify main idea	Identify details related to the theme of a story	Recount events contributing to the theme using details	Recount main events related to the theme
ELA.C1.2	ELA.EE.RL.9-10.4	Identify descriptive words	Identify the words or phrases to complete a literal sentence	Determine the meaning of idioms and figures of speech	Determine the meaning of words and phrases	Determine the meaning and impact of words and phrases
ELA.C1.2	ELA.EE.RI.9-10.1	Identify concrete details in a familiar informational text	Identify concrete details in an informational text	Cite textual evidence for inferred information	Discriminate between citations for explicit and inferred information	Cite evidence for a text’s specific meaning

Levels mastered this year
  No evidence of mastery on this Essential Element
  Essential Element not tested

This report is intended to serve as one source of evidence in an instructional planning process. Results combine all item responses from the full academic year. Because your child may demonstrate knowledge and skills differently across settings, the estimated mastery results shown here may not fully represent what your child knows and can do. For more information, including resources, please visit <https://dynamiclearningmaps.org/states>.

Page 3 of 6

The format of the sample applies to all DLM subjects. For science reports, the table within the Learning Profile will only contain three columns under “Level Mastery” which correspond to the three linkage levels in science (Initial, Precursor, and Target).

Remember, convey to parents how the DLM assessment is a part of their child’s educational journey.

## Other Information

The following information may help you talk with parents/guardians about other aspects of DLM assessments. Use the TEST ADMINISTRATION MANUAL, found on your state's DLM webpage, to locate other information that will help with your conversations.

About the assessment administration

- Explain that this is not a typical assessment. The students are administered 3-9 items grouped together in small testlets. Each testlet is at one level for one Essential Element.
- Explain how the student accessed the assessment (computer or other device) and what accessibility supports were used.
- Explain that the testlets can be either teacher-administered or computer-delivered, depending on the student.
- Since the reports from a year's testing are being shared with the parents/guardians the following fall, consider sharing the Essential Elements for the next grade the child will be taught.

Be prepared to show examples of the Essential Elements. The Essential Elements are available to share. You may explain the assessment and what the student sees on the computer screen. However, do not give specific examples of assessment items. The assessment items are secure even after test administration is complete. Example testlets that can be shared with parents/guardians are available in the [Instructional Resources \(IE\)](#) (select the tab for the correct subject and then select "Testlets" on the left).

Additionally, parents/guardians can download Student Portal and use practice activities and released testlets that are available on the DLM website to have a good understanding of what the testlets are like. Show them the [Released Testlets for At-Home Instruction \(pdf\)](#) so they know how to find these available testlets.

Notes:
